Order Information:

G22441CB1C00	24 x 41 Black Brine Tank
G22450CB1C00	24 x 50 Black Brine Tank
G23050CB1C00	30 x 50 Black Brine Tank
H1080	24" Plastic Brine Grid (2 plates/set)
H1032	30" Plastic Brine Grid (2 plates/set)
H1089	PVC "Legs" For 24" Grid (7/set)

Clack now offers both 24" and 30" round blow molded brine tanks. The introduction of the 30" diameter tank makes it the largest blow molded brine tank for commercial/industrial applications. Like the 24" round tank, the 30" tank is molded of FDA approved high density polyethylene for exceptional stress-crack resistant properties. These tanks are ideal for industrial and commercial use and the 30" tank feature heavy wall thickness for increased durability.

Injection molded grids are available for both 24" and 30" tanks and use 1½" schedule 40 PVC pipe for leg supports. The legs can be cut to any length for easy grid height adjustment. A precut leg kit for the 24" grid is also available, giving it an overall grid height of 10¼"

TANK SIZE in.	LIQUID CAPACITY gal./liters	SALT CAPACITY lbs./Kg	HEIGHT WITH LID in./cm	DIAMETER in./cm	SHIPPING WEIGHT lbs./Kg	MASTER CARTON ft. ³ /units per
24 x 41	80/303	700/318	42½/108	24½/62	23½/10.7	15/1
